Turf King Fertilizer with 0.172% Dithiopyr provides season-long control of crabgrass and control or suppression of listed annual grasses and broadleaf weeds in established lawns and ornamental turf, including golf course fairways, roughs and tee boxes, and in established landscape ornamentals. For use on plants intended for sale as pot and container specimens or plants that are to be grown in ornamental gardens or parks, or on golf courses or lawns.

In the state of New York this product may be applied only by commercial applicators at no more than 288 lbs. (0.5 pounds AI) per acre (70 lbs. per 1,000 sq. ft.) per year. Not for use in Nassau or Suffolk Counties.

DIRECTIONS FOR USE
- Apply this product only to seeded, sodded, or sprigged turf that is well established. Before the use of Turf King Fertilizer with 0.172% Dithiopyr, roots must be developed and the turf at least at the 6-leaf stage to ensure optimum results. Injury may result if the turf is not well established or is stressed by weather, pests or other conditions.

NOTE: This is not possible to evaluate in turfgrasses for tolerance to this product. It is suggested that the user evaluate the response to Turf King Fertilizer with 0.172% Dithiopyr on selected plots of any variety before large scale use.

PRECAUTIONARY STATEMENTS
- Harmful if inhaled. Causes moderate eye irritation. Avoid breathing dust. Remove and wash contaminated clothing before reuse. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. Wear long-sleeved shirt and long pants, gloves, eye and respiratory protection if exposed to fine dusts. Protect skin or respiratory tract of persons who are sensitive to the product. Precautions or frequency of treatment may not be required for the users who may be exposed to fine dusts. Avoid respiratory irritation standards for treated areas shall be followed before application of this product.

CONTROL OF OTHER GRASS AND BROADLEAF WEEDS

FOR USE ON TURF
- Turf King Fertilizer with 0.172% Dithiopyr provides season-long control of crabgrass and control or suppression of listed annual grasses and broadleaf weeds in established lawns and ornamental turf, including golf course fairways, roughs and tee boxes. Dithiopyr 0.172% Turf Fertilizer will not harm newly established ornamentals specified the label as "Tolant Ornamental" when used according to label directions.

Information concerning the raw materials composing this product can be obtained by writing to the Guarantor listed on this label, and referring to the batch number found on this container.

In the spring following a fall application provided the maximum application rate per year is not exceeded. Refer to "Use Restrictions" section above.

SPRING APPLICATIONS: For single applications in the spring or early summer, follow the appropriate rate listed in "TABLE 1: APPLICATION RATES FOR CRABGRASS CONTROL" for the target grasses and use the rates indicated. Refer to the "Use Restrictions" section above for regional application rates. This product will provide 3-5 months of pre-emergence crabgrass control. Do not reapply this product for early post-emergence control of crabgrass.

When used as directed for late summer or early fall use, for crabgrass control through the early part of next spring, Turf King Fertilizer with 0.172% Dithiopyr will also control or suppress the following weeds when applied prior to their emergence.

CONTROLLED BY

MEANS CONTROLLED

SPRING APPLICATIONS: For single applications in the spring or early summer, follow the appropriate rate listed in "TABLE 1: APPLICATION RATES FOR CRABGRASS CONTROL" for the target grasses and use the rates indicated. Refer to the "Use Restrictions" section above for regional application rates. This product will provide 3-5 months of pre-emergence crabgrass control. Do not reapply this product for early post-emergence control of crabgrass.

When used as directed for late summer or early fall use, for crabgrass control through the early part of next spring, Turf King Fertilizer with 0.172% Dithiopyr will also control or suppress the following weeds when applied prior to their emergence.
OFFER THIS PRODUCT, AND THE BUYER AND USER ACCEPT IT, SUBJECT TO THE FOREGOING CONDITIONS OF SALE AND WARRANTY.

USE FOR LANDSCAPE ORNAMENTALS

Terrific Fertilizer with 0.172% Dithiopyr provides preemergence control or suppression of annual grass and broadleaf weeds in landscape ornamentals. Refer to "Use on Turf" section of the label for a complete listing of weeds controlled or suppressed. This product may be applied to soil surfaces or soil surfaces mulch where ornamental plants are grown for aesthetic purposes in ornamental gardens, parks, golf course, and residential areas.

APPLICATION INSTRUCTIONS

Terrific Fertilizer with 0.172% Dithiopyr is a preemergence herbicide that will not control established weeds. Make applications prior to weed seed germination to gain control. For best results, apply Terrific Fertilizer in the fall, a few weeks after a frost, or when weeds and frost-dead leaves are present. Before applications, any existing weathering should be removed by hand weeding, cultivation, or with the use of a postemergence herbicide. Once the application is made, do not disturb the soil surface as the herbicide barrier will be broken. Irrigate immediately after application to remove herbicide particles from the foliage to prevent foliar damage to ornamentals.

APPLICATION EQUIPMENT AND INSTRUCTIONS

This product may be applied with drop or rotary-type spreaders designed to apply granular herbicides. For best results, apply this product evenly and uniformly avoiding excessive spreading, skips or overlaps. Avoid the use of spreaders that tend to apply granules in narrow or concave bands. Calibrate the spreader according to the manufacturer’s directions. Initial spreader settings may require adjustment to deliver the recommended application rate under actual application conditions. The calibrated calibration setting may be marked or recorded for future reference.

Apply this product uniformly over the treatment area. More uniformly can be achieved by applying one-half of the required amount of product over the treatment area and then applying the remaining one-half in a different direction (e.g., at a right angle to the previous direction). Check equipment frequently to verify calibration and proper functioning. Clean and lubricate spreader after use.

SPILL OR SEQUENTIAL APPLICATIONS

Split or sequential applications may be used to provide improved weed control or to provide extended weed control in areas with long growing seasons. Split applications may be made with rates in Table 2 being split between two applications made 5-10 weeks apart. Where longer periods of control are required, sequential applications may be made in the spring or fall following a spring application or in the spring following a fall application to maintain the maximum application rate per year not exceeded.

USE RESTRICTIONS

• Only apply this product to established ornamentals.
• Do not apply this product to water bodies or over any portion of ornamental plants as it may result.
• DO NOT incorporate this product into soil. Solution of active ingredient and plant root injury may occur.
• DO NOT apply in soil around ornamental trees or plants under stress due to drought or cold or soil or soil, wind injury, hail, frost damage, winter injury from previously applied pesticides or injury due to insects, nematodes, or disease.
• DO NOT apply under conditions that would affect product distribution (such as windy conditions).
• DO NOT apply this product on grass greens for golf.
• DO NOT graze livestock or feed hay or crops from areas treated with this product.

USE RATES

Apply Terrific Fertilizer with 0.172% Dithiopyr with a properly calibrated spreader that will provide even product distribution. Refer to Table 2 below for product rates when treating a small area.

DO NOT apply more than 6.7 lbs. of this product per 1,000 sq. ft. per application and no more than 20 lbs. of this product per 1,000 sq. ft. per year.

In New York State, this product may only be used by Professional Applicators at no more than 6.7 lbs./1,000 sq. ft. (3 lbs./active ingredient per acre) per year, and is prohibited from use in Nassau and Suffolk Counties.

TOLERANT ORNAMENTALS

When applied as directed under the conditions described on this label, these ornamentals have shown tolerance in field trials. However, this product has not been tested on all cultivars of each species or under all possible growing conditions. A limited area involving only a few plants should be treated for tolerance evaluations before large-scale application.

APPLY THIS PRODUCT UNFORMELY TO THE ORTMENTED AREA. MORE UNFORME Can BE ACHIEVED BY APPLYING ONE-HALF OF THE REQUIRED AMOUNT OF PRODUCT OVER THE TREATMENT AREA AND THEN APPLYING THE REMAINING ONE-HALF IN A DIFFERENT DIRECTION (E.G., AT A RIGHT ANGLE TO THE PREVIOUS DIRECTION). CHECK EQUIPMENT FREQUENTLY TO VERIFY CALIBRATION AND PROPER FUNCTIONING. CLEAN AND LUBRICATE SPREADER AFTER USE.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

STORAGE: Store in original container in a locked storage area out of reach of children and domestic animals.

PESTICIDE DISPOSAL: Washes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Empty-containers of products do not require re-filling this container. For recycling, if available. Do not remove air required for air. If not available, then dispose of container in a sanitary landfill or if allowed by State and local authorities, by burning, if burned, stay out of smoke.

If polluted: Call your local solid waste agency for disposal instructions. Never pour unused product down any indoor or outdoor drain.

CONDITIONS OF SALE AND WARRANTY

NOTICE: Read the entire Directions for Use and Conditions of Sale and Limitations of Liability and Before Buying and using this product. If the terms are not acceptable, return the product at once, unopened, and the purchaser will be refunded.

The DIRECTIONS FOR USE of this product are believed to be reliable and should be followed carefully. However, it is impossible to eliminate all risks associated with the use of this product. Law and tort referrals, healthfulness or other unintended consequences may result from such factors as weather conditions, presence of other materials, or use of this product in a manner inconsistent with its labeling, all of which are beyond the control of Aniole & Son or the manufacturer.

To the extent consistent with applicable law, all such risks shall be assumed by the buyer.

Aniole & Son warrants that this product conforms to the chemical description on the label, and is reasonably fit for the purposes set forth in the DIRECTIONS FOR USE, when used in accordance with such directions, subject to the inherent risks mentioned above.

To THE EXTENT PERMITTED BY LAW, Aniole & Son NEITHER MAKES NOR EXTENDS, NOR DOES IT AUTHORIZE ANY REPRESENTATIVE TO MAKE ANY OTHER WARRANTIES, EXPRESSED OR IMPLIED, AND IT EXPRESSLY DISCLAIMS AND DISCLAIMS ALL IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. THIS WARRANTY EXTENDS TO, AND THE BUYER SHALL BE SOLELY RESPONSIBLE FOR ANY AND ALL LOSS OR DAMAGE WHICH RESULTS FROM THE USE OF THIS PRODUCT IN ANY MANNER WHICH IS INCONSISTENT WITH THE LABEL DIRECTIONS, WARNINGS, OR CAUTIONS. BUYER'S EXCLUSIVE REMEDY AND MANUFACTURERS OR SELLER'S EXCLUSIVE LIABILITY FOR ANY AND ALL CLAIMS, LOSSES, DAMAGES, OR INJURIES RESULTING THEREFROM IS THE REMEDY OF REPAIR OR REPLACEMENT OF THE PRODUCT OR REPLACEMENT OF THE PURCHASE PRICE OF THE PRODUCT IN WHOLE OR WITH RESPECT TO WHICH DAMAGES ARE CLAIMED. IN EVENT SHALL MANUFACTURER OR SELLER BE LIABLE FOR SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES RESULTING FROM THE HANDLING OF THIS PRODUCT. Aniole & Son and the SELLER OFFER THIS PRODUCT, AND THE BUYER AND USER ACCEPT IT, SUBJECT TO THE FOREGOING CONDITIONS OF SALE AND WARRANTY.
